JOSHIKA SRI SP

Tirupur, Tamil Nadu | 8754285996 | joshikasri104@gmail.com | linkedin.com/in/joshika-sri-sabareesh-931406380 | github.com/joshikasri104

PROFESSIONAL SUMMARY

Motivated Computer Science student specializing in Data Analytics, with foundational skills in programming, data analysis, and web technologies. Interested in applying technical knowledge to practical projects, learning emerging technologies, and contributing effectively in collaborative teams.

EDUCATION

Bachelor of Science in Computer Science with Data Analytics **2025–2028**
KPR College of Arts Science and Research | Coimbatore | CGPA: 7.79/10

Higher Secondary (Class XII) **2024–2025**
Vivekananda Vidyalaya Matriculation Higher Secondary School | Percentage: 88.5%

SSLC (Class X)
Vivekananda Vidyalaya Matriculation Higher Secondary School | Percentage: 67.4%

TECHNICAL SKILLS

- **Programming:** C, C++, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript
- **Database:** SQL, MySQL
- **Tools:** Google Colab, GitHub, Visual Studio Code
- **Core Areas:** Data Analytics, Data Visualization, Object-Oriented Programming fundamentals

INTERNSHIP EXPERIENCE

Data Analytics Intern | CodeAlpha
- Completed a one-month internship focused on practical data analytics tasks and project-based learning.
- Worked on data analysis and visualization activities, including dataset exploration and presenting insights.

PROJECTS

EduDoubt AI – AI-Powered Student Doubt Assistant
- Developed an AI-based learning assistant concept to answer student questions, explain topics, support step-by-step problem solving, and generate quizzes using Python and Gradio.

Amazon Review Analysis & Web Scraping
- Collected and explored product review data, then analyzed review patterns to derive useful insights using Python-based data analysis tools.

Iris Dataset Analysis & Visualization
- Performed exploratory data analysis on the Iris dataset and used visualizations to understand feature patterns and compare flower classes.

AI-Driven Carbon Footprint Optimization
- Worked on a project concept focused on understanding carbon-footprint factors and identifying data-driven opportunities for reducing environmental impact.

LEADERSHIP & ACTIVITIES

- Participated in academic and project-based activities related to computer science and data analytics.
- Presented project ideas and collaborated with peers during college project work.
